Profile

An intellectual, enthusiastic and skilled computer science engineer who has explored the new agendas. I am determined to the relevant and honest dedication towards my work and responsibilities. I'm willing to learn from one to next level of learning to become a proactive self-starter. Looking for the opportunities in the field of development to enhance the growth of the organization and to build up my professional career.

Projects

Portfolio Using NEXTJS :

The main aim was to develop a portfolio to show case the introduction and the information regarding the skills and previous working experience using the latest library of NextJs.

Weather and Forecast App using React:

The Weather web app allow users to check for the current weather conditions for the cities in the world. With the temperature it also gives us the forecast conditions fro the next 7 days also. The Tech stack that have been used are React , Javascript and Css.
